

- 
- The diagram shows a floor plan with a central large room and several smaller rooms and corridors. A legend in the center identifies three paths for T2:
- Offline Positioning for  $T_2$  (Red line)
  - PDR Positioning for  $T_2$  (Blue line)
  - $T_2$  Ground Truth (Green line)
- The paths start in the top right, go left, then down, then left again, and finally down to the bottom right. The Offline Positioning path (red) shows significant deviation from the Ground Truth (green) in the top right and bottom right areas. The PDR Positioning path (blue) follows the Ground Truth (green) much more closely throughout the entire route.
